These spiders can be deadly or lead to severe illness.

| | | |
|---|---|---|
|  | <p>Sydney Funnel-Web Spider Male up to 25mm (long spinnerets) Ground dwelling so watch for males active in summer and autumn. Venom is highly toxic. Wear shoes in the yard and gloves when gardening. Stand clear.</p> | <p>In case of bite Apply a pressure bandage, immobilise and get to a hospital fast. Treatment includes antivenom, admission to a critical care area and monitoring for 12–24 hours until all evidence of envenoming has resolved.</p> |
|  | <p>Red-Back Spider Female to 14mm, Male to 3mm. Builds a web often found under outdoor furniture, logs and rubbish. Look first and wear gloves. Stay clear.</p> | <p>In case of bite Pressure bandaging is contraindicated in Red-back spider bites and get to a hospital fast. Treatment may include antivenom depending on severity.</p> |
|  | <p>White-Tail Spider Female to 20mm, Male to 12mm. Ground dwelling and active in the garden, under bark, rocks but will wander indoors. Can get caught in unattended bedding, clothes or shoes. Look first. Stand clear.</p> | <p>In case of bite Bites cause pain, and some bites will leave a persistent red mark, associated itchiness and pain or lump lasting up to a week. Current evidence suggests that spider bites are very unlikely to cause necrotic lesions as commonly believed and such cases presenting as suspected spider bites should be thoroughly investigated for other causes. Play it safe and get to hospital.</p> |

Poisonous and painful
